## **PRESS RELEASE FOR IMMEDIATE RELEASE**

**Cleveland, Ohio (February, 2006):** The Formtek Group of companies which includes Cooper-Weymouth, Peterson (CWP), B&K, Dahlstrom, Engel, FMI/Dahlstrom, Hill Engineering, Iowa Precision Industries, Iowa Rebuilders, Lockformer, Rowe, Tishken, Winpro, and Yoder announced Winpro supplies another SFM-Series roll former to a major window and door manufacture just outside of Toronto. The 20-pass machine is economical enough that we were able to easily justify it by producing only one screen frame. The customer goes on to say that for future growth, the machine has three (3) additional tooling locations where he can make other roll formed products as his needs grow. Please contact Rick Wilson at (216) 360-7616 or at [Winpro@formtekleveland.com](mailto:Winpro@formtekleveland.com) for more information.
