## **PRESS RELEASE FOR IMMEDIATE RELEASE**

**Cleveland, Ohio (January, 2006):** The Formtek Group of companies which includes Cooper-Weymouth, Peterson (CWP), B&K, Dahlstrom, Engel, FMI/Dahlstrom, Hill Engineering, Iowa Precision Industries, Iowa Rebuilders, Lockformer, Rowe, Tishken, Winpro, and Yoder announced Winpro lands an order for an S-Series Roll Former from a large window manufacturer based on the east coast. The 8-pass roll former has a compact footprint that made it perfect for their application. The manufacturer says the justification was made easy due to the flexibility offered by the Winpro S-Series. We can produce four (4) different shape stiffeners using just one machine, this combined with the short product changeover time and unbelievable speed, gives us the capability to manufacture enough pre-cut product for several of our plants. Please contact Rick Wilson at (216) 360-7616 or at [Winpro@formtekleveland.com](mailto:Winpro@formtekleveland.com) for more information.
